DRY LUMBER IN SHEDS

The most up-to-date yard on the Goose Lake Line

We have been able to undersell all competition, wholesale in car lots and our retail prices are in keeping with the cost of running a retail yard.

Garages and Implement sheds are now the thing, as well as glazed and screened porches.

Screens—Doors—Pickets—Poles etc.

Brick—Lime—Plaster—Cement—Gyproc Wall Board.

Wagon Oak always in stock.

The Hat Shoppe

Having to vacate my place of business by
July 1st

I am offering my stock of millinery at reduced prices.

One table of Millinery at	\$2.95
One table of Millinery at	3.95
One table of Millinery at	4.95

Mrs. R. E. Gillespie

Ice Cream

and Cold Drinks

are well kept in our new

Frigidare Electric Cabinet

recently installed

This week we have bulk ice cream in Orange, Maple Walnut and plain Vanilla. Also Brick ice cream.

Pure ice cream is a wholesome food. Taken fresh from our Frigidare and packed in containers it can be carried long distances without losing its firmness. Take some home with you, you will enjoy it.

40 cents a pint. 75 cents a quart. Bricks 45 cents each.

Groceries—Confections—Tobaccos—Men's Wear

Ball Team Do Well At Alaskan

Participating in the ball tournament at Alaskan last Friday, the Oyen ball club turned in three brilliant performances. Defeating Sibbald in the first game 5 to 0, they met Chinook in the next round and eliminated them by a similar score. In the final game against Alaskan they lacked only one run, to triplicate their previous efforts, winning by a score of 4 to 0.

In commenting on the players it would be hard to single out any individual on the team, for special mention. Three pitchers were used in three games, and each won without a run being scored against them. Not having any runs scored against them in three games, it naturally follows that the fielding was excellent, and scoring five runs, five runs and four runs respectively in three consecutive games also suggests that the batting was good.

The normal line-up of the team given in batting order, is: Les Pears, 1st b., Phillips, s., Chapin, 2nd b., L. Stull, f., McMurray, p., Carl Stull, f., Gosselin, 3rd b., Fowler, c., and Wes Horne, c.f. with Green and Scott as subs.

The pitching staff of the team is: McMurray, L. Stull, Gosselin and Wes Horne.

The teams record for the season to date is:

Played	Won	For Against
22	4	0

Pool Terminal Storage

To Be Increased

The Alberta Wheat Pool is continually increasing its elevator system. On Monday of this week the contract was let, more than doubling the storage of the new Pool terminal at Vancouver. The number of Pool elevators in Alberta has been increased until the total is close to the 400 mark.

The Pool's continual objective is to handle as much of member's wheat as possible through Pool elevators. Each year sees an increase in the volume of Pool wheat handled through Pool facilities. This year the total is around 95 per cent.

The new Vancouver terminal was completed last fall and had storage facilities to handle 2,500,000 bushels of wheat. With the proposed additional storage of 2,750,000 this elevator will have a total capacity of 5,250,000 bushels. This will provide total terminal space owned and controlled by the Alberta Wheat Pool on the Pacific coast of 8,150,000 bushels.

The contract for building the additional storage in Terminal No. 1 was let to Carter, Hall & Aldinger of Winnipeg. C. D. Howe and Company, Fort Arthur, are consulting engineers.

Ball Tournament Here Monday, June 3

All roads lead to Oyen, Monday, June 3, for the baseball tournament. First Game called for 1 p.m.

Those who have not already seen the Oyen team in action this year, should see them Monday. The boys are better than ever, and will no doubt give the fans fine entertainment.

School Children Listen To

Empire Day Radio Program At Oyen Theatre, Thursday

The pupils of Oyen high and public schools, listened to the Empire Day program broadcast from the University of Alberta, in Oyen Theatre, Thursday, afternoon, May 23. The program included speeches by King George and Queen Mary, Premier Brownlee, Hon. Perrin Baker, and choruses by Edmonton school children.

The theatre was loaned for the occasion by Mr. Ralph Shaker, and the radio set by Mr. E. D. Thygesen. Installation and management of reception was in charge of Mr. A. E. Johnson.

While the choral work of the Edmonton pupils came in very clearly and proved enjoyable entertainment, the speeches were hard to follow on account of echoing in the auditorium, and in this respect were rather disappointing.

Fire Bucket Brigade

Constable Green, H. E. Bradford, H. R. Chapin, W. R. Cutlan, H. J. Cooper, R. E. Gillespie, Dr. J. F. Kerr, A. R. Kerr, Father Lynett, Thos. Lees, Joe Long, J. B. Lowe, H. O. LaBelle, G. A. Morrison, W. S. Marshall, James Marshall, W. D. Morrell, S. A. Miller, Dr. S. R. McGregor, E. MacArthur, F. E. Reid, Bobb, Nisbet, J. J. Parrell, J. F. Rorbeck, John Shields, Carl Swenson, Roy Sharp, Chas. Stewart, S. E. Trewin and Rev. H. C. Woods.

FARM FOR SALE

N. E. 130-25-3 With Meridian, Alberta, subject to taxes for the current year.

Tenders marked S.C. 2001 addressed to L. F. Clarry, Esq., K.C., Master in Chambers, Court House, Calgary, will be received up to eleven o'clock in the forenoon of the 15th day of June, 1929, for the purchase of the above property.

Location: 10 miles from Acadia Valley, Railway Station, 6 miles from Haven Post Office, two and a half miles from Eldersdale School. Soil, sandy loam, five to eight inches deep. Subsoil, sand and gravel. Improvements: 125 acres under cultivation. Barn 30 x 35, frame. Barn 20 x 24, frame. Hen house, 8 x 10, frame. House, 12 x 24, frame. Good well, equipped with pump and windmill. 1 1/2 miles of fencing.

TERMS: 5 per cent with tender, 10 per cent on acceptance of tender when possession will be given, and the balance in 3 equal instalments in 6, 12 and 18 months with interest at 8 per cent per annum, or if the purchaser desires, full payment will be accepted within 90 days without interest. In all other respects the standing conditions of sale will apply.

Tenders must be accompanied by marked cheque for 5 per cent of the offer which will be returned in the event of non-acceptance. No tender necessarily accepted.

FOR FURTHER PARTICULARS apply to Macdonald, Robertson, Winter & Edmansons, Solicitors for the Plaintiff, Canada Life Building, Calgary, Alberta. Refer to the 37106-W.C.R.

DATED at Calgary, the 15th day of May, A.D. 1929.

Fighting Insect Pests In Canada

Estimated Cost Of Depredations Is Over \$100,000,000 Annually.

The Dominion Entomologist, Arthur Gibson, estimates that in the aggregate insects cost Canada well over \$100,000,000 annually. This is the loss to field and fruit crops and it must be added the loss to forest and small shade trees, stored produce, etc. While these latter losses are difficult to estimate they easily average over \$30,000,000 a year.

Insects are costly, their control one of the greatest problems with which any country is confronted. The chief of the bureau of entomology in the United States recently made the statement, "It has become strikingly obvious that insects are collectively the most important enemies of humanity on the earth. It has become perfectly plain that if human beings are to maintain their hold on this globe, if they are to continue to exist, they must learn to control insects."

That seems to be the recognized attitude, and to help the Dominion Entomologist record what has been done by the federal department of agriculture in an effort to control insects, shows that the authorities are fully alive to the seriousness of the situation.

The economy of such control work is well illustrated in the case of Dark Breets in Yellow Pine. These insects threatened the forests of yellow pine in British Columbia with complete destruction about six years ago. The federal and provincial departments of agriculture co-operated in control work, and destroyed more than 50,000 beetle-infested trees. The cost of these operations amounted to \$100,000, and the yellow pines which stand saved from total destruction were worth \$800,000.

A similar story might be written respecting grasshoppers, the Oriental peach moth, the apple maggot, hop insects, the pear apple, apple bud moth, woolly aphid, the western cedar borer, wireworms, cutworms, white grubs, etc. It is a case of war to the death of the insects, in order that man may live.

The entomological branch is protective in every sense of the word, and the destructive insect and pest, not which the branch administers, is one of Canada's most important legislative measures, based as it is on the fact that the best way to control dangerous insect pests and plant diseases is to prevent their introduction.

Nations Must March Together

Britain Cannot Do All But Paying and Borrowing So Britain

"Foreign nations must not expect Great Britain to do all the disarming and debt paying," declared Premier Stanley Baldwin, in a campaign speech at Monmouth, when he discussed the work of the League of Nations.

"That is not the spirit of the League and covenant," he went on. "We have all got to march forward together and we will march with the quickest, as we have been doing. We are marching a little quicker at the moment, but the other nations cannot lag behind. The best way to control things we want to see Europe split once more into hostile camps."

Alberta Gas Production

Figures published by the department of the interior show that Alberta's natural gas output in 1928 totalled more than 14,188,000 cubic feet. During the coldest day of the year, January 26, Calgary used 54,000,000 cubic feet, with a peak hourly demand of 60,000,000 cubic feet per day. On several other days of the same week approximately 48,000,000 cubic feet were delivered and consumed in the city.

It isn't what a woman says that influences a man, but the way she says it.

"Everybody has one foot smaller than the other."

"With me it is the opposite. I have one foot larger than the other."

—Maurice, Chariot.

Helpful Hint To Gardeners

Vegetable Plants Should Be Thinned Out When They Are Small

Beginners in vegetable gardening are almost sure to make the mistake not only of sowing seed much too thickly, but also of leaving the plants too thick in the row. A very large amount of seed is wasted each year because of this and failure to have plants develop properly is another result of over sowing. To the sower of the seeds than the waste of seed. Thinning of all vegetables is desirable as soon as the plants are large enough to catch hold of, that is, quite small. Lettuce can be used even though the plants are thick, but to have satisfactory individual plants of lettuce the plants should be thinned to five or six inches apart, and the plants of head lettuce should be thinned to eight inches or more apart. They will not develop satisfactory heads if much closer than this. It has been found in the Horticultural Division, Experimental Farm, Ottawa, writes W. T. Macoun, Dominion horticulturist, that the larger the lettuce head the more satisfactory results are obtained when the heads are nearly one foot apart. Carrots should be thinned to about an inch and one half apart, beets to two inches apart; parsnips to two inches apart; onions to six inches apart; spinach four to six inches apart. If the plants are rather thick they are thinned as ready for use. Often too many kernels of corn are left in the hill. Five or six ears per plant are sufficient to leave after the cutworms and birds have taken their toll. Bean plants should be from two to four inches apart, and peas about one inch apart.

Vegetables will not develop satisfactorily if the plants are thick, and judicious thinning is very important.

The Realm of Fancy

People Who Make Believe Escape Drudgery Of Daily Round

David Copperfield tells us how he comforted himself in his lonely childhood by impersonating his favorite characters in fiction. He went about as David Copperfield, as Captain Jack, as a knight, as a hero, as a captain and a hero, in spite of the drudgery of the world. There are still hundreds of children who live with an unseen playmate, or the impudent person get no salaries. The teachers make their living by private teaching while the students make their way by copying manuscripts or reciting the Koran. The teaching has been largely limited to the Koran, for it is an Islamic school, church doctrines and decisions in church law affecting all members of the faith have long come from the university. The plan now is to modernize the school and raise the standard, and the first rule adopted was that the number of students should be limited to 5,000.

"Loan me five dollars, will you?"

"Sorry, but I have but four dollars and seventy-five cents."

"Well, please lend me I'll trust you for the other quarter."

Wolf: "The doctor said he would make a diagnosis of my case. What's a diagnosis?"

Levis: "It's the Latin term for five hundred dollars."

"Something Was Flying"

It had been a dingy case for everybody concerned. The plaintiff and the defendant were both slow-witted, and everything had had to be explained to them at least twice.

"Do I understand, my man," said the magistrate at one point, "that the defendant buried himself in you?"

The plaintiff scratched his head wildly. Then a look of understanding dawned in his eyes as he replied, "No, sir, to tell the truth, it was only bricks he threw at me; but what I complained about was the terrible way he snore at me when they nailed."

Very Descriptive

It was visiting day at the human asylum. One of the inmates imagined himself to be an artist, and he was busily engaged with dabbling at an empty canvas with a dry brush. A visitor, wishing to humor him, asked what the picture represented.

"That," said he, "is a picture of the inmates being pursued through the Red Sea."

"Where is the sea?"

"Why, that's rolled back to allow the inmates to pass."

"They've just gone by."

"Then where are their pursuers?"

"Oh, they'll be along in a minute."

Teacher: "What is a prescription?"

Jimmy O'Brien—That's a piece of paper the doctor gives you and then they go to the drug store and get what they want with it.

"I understand your son has been in Italy for some time."

"Yes, indeed he's become quite Italianized."

The Storing Of Eggs

New Methods of Handling Eggs Greatly Improved Quality Of Storage Eggs

This is the season of heavy egg production when stocks not required to meet the daily demands are going into cold storage to be brought out for use when production is low. The storing of eggs is greatly improved in recent years, so much so indeed, that stored eggs are no longer looked upon with suspicion and doubt. Eggs that go into storage have to be submitted to the candling process which determines definitely their quality. Only those that are in prime condition are ever put away in storage quarters. The modern cold storage for eggs is a highly sanitary place not only in its cleanliness, but also by reason of the manner in which it is maintained. The temperature is held at all times close to the freezing point and of such consistency with respect to moisture as to reduce evaporation to a negligible degree. Not only are the eggs graded when put in, but the regulations governing eggs, covered by the Live Stock and Live Stock Products Act, of the Department of Agriculture, at Ottawa, require that they should again be graded when they are brought from the storage chamber to go into commerce.

The usual egg cold storage in Canada is what is known as dry cold storage into which eggs are placed in their natural state. In Western Canada much of the eggs are put through an additional process before being placed in the storage quarters. The fresh eggs are immersed for an instant in hot oil which not only sterilizes but seals up the shell, preventing evaporation from within and continuing to keep the eggs fresh. After treatment in this way the eggs are put through a sand blast machine which removes the excess oil and leaves the shell of a frosty appearance. They are then cold stored in the usual way. With the marketing of only graded eggs, whether fresh from the farm or out of storage, the loss from bad eggs has been almost eliminated in egg merchandising.

Egypt Has Large University

Number Of Students Is To Be Reduced To Five Thousand

One of the largest universities in the world, if it may properly be called a university, is that of Al Azhar, Cairo, Egypt. It has no fewer than 14,000 students.

But the students pay no fees and the professors get no salaries. The teachers make their living by private teaching while the students make their way by copying manuscripts or reciting the Koran. The teaching has been largely limited to the Koran, for it is an Islamic school, church doctrines and decisions in church law affecting all members of the faith have long come from the university. The plan now is to modernize the school and raise the standard, and the first rule adopted was that the number of students should be limited to 5,000.

"Loan me five dollars, will you?"

"Sorry, but I have but four dollars and seventy-five cents."

"Well, please lend me I'll trust you for the other quarter."

Wolf: "The doctor said he would make a diagnosis of my case. What's a diagnosis?"

Levis: "It's the Latin term for five hundred dollars."

"Something Was Flying"

It had been a dingy case for everybody concerned. The plaintiff and the defendant were both slow-witted, and everything had had to be explained to them at least twice.

"Do I understand, my man," said the magistrate at one point, "that the defendant buried himself in you?"

The plaintiff scratched his head wildly. Then a look of understanding dawned in his eyes as he replied, "No, sir, to tell the truth, it was only bricks he threw at me; but what I complained about was the terrible way he snore at me when they nailed."

Very Descriptive

It was visiting day at the human asylum. One of the inmates imagined himself to be an artist, and he was busily engaged with dabbling at an empty canvas with a dry brush. A visitor, wishing to humor him, asked what the picture represented.

"That," said he, "is a picture of the inmates being pursued through the Red Sea."

"Where is the sea?"

"Why, that's rolled back to allow the inmates to pass."

"They've just gone by."

"Yes, indeed he's become quite Italianized."

Little Sheila Watson, of Winnipeg, is very proud of the fact that she was a passenger on the "Metagama" at the age of three years. She has disguised herself as a parcel and plastered herself with C.P.R. labels, but the one on her cap reads "Wanted," as one supposes she is.

Bright Package

Little Sheila Watson, of Winnipeg, is very proud of the fact that she was a passenger on the "Metagama" at the age of three years. She has disguised herself as a parcel and plastered herself with C.P.R. labels, but the one on her cap reads "Wanted," as one supposes she is.

The Value Of Suggestion

Rural Pictures Would Stimulate In Children Love Of Farm Life

Sea pictures have long been the cause of inspiration to wanderers who have answered the call of the sea by going down to the sea in ships, read an article in the May issue of "Successful Farming," it is suggested that paintings of rural scenes, especially animals, may in the long run be a child to become a farmer.

"It would seem," that parents who are desirous of having their boys and girls become farmers, should choose a country environment in which to spend their lives, should not overlook the fact that certain pictures may have an influencing effect on them. Pictures of animals, and of landscapes that depict the peace, beauty, and charm of rural scenes, are surely the most suitable for all lovers of the country to hang in their homes. This type of picture has been painted by many great artists, and colored reproductions of them can be obtained at a very moderate price.

"There are so many suitable pictures that only a few can be named girls such as 'Horse Pair,' 'Ploughing,' 'Sheep,' 'Springtime,' 'Cows and Calves' and 'Horses at Watering Trough.' Then there are the beautiful pictures of lovely landscapes that cannot fail to charm every lover of rural scenes: 'Hay Wain,' 'Landscape,' 'Landscape with Cattle,' 'Harvest,' 'Wagon,' 'Berkshire Hills,' and 'Autumn Oaks.'"

Nature A Good Provider

Natural gas from 250 miles away will soon boil the potatoes in San Francisco and other California cities brought thither through pipes welded at the joints so as to form a continuous line. Old Mother Earth is always a good provider if only a little co-operation is given her.

Hydro-Electric Energy

The daily average generation of electric energy from water power in Canada was 46,475,000 kilowatt hours in March, an increase of nearly 9 per cent. over the same month of last year.

The Illustration Stations

Purpose Is To Demonstrate the Varieties Of The Different Crops

Answering a question about the operation of the illustration stations supervised by the Experimental Farms Branch, asked by a member of Parliament in the House of Commons, the Hon. Dr. Motherwell, Minister of Agriculture, explained that the government does not operate the 186 illustration stations distributed over Canada, but the Department does give operators some assistance. He said, "The illustration area of main's farm includes only that part of it fronting on a well travelled road and varies in area from eight or ten to forty acres. For the privilege of saying what crops shall be grown, what rotation shall be followed, and how and when cultural operations shall be performed, the Department pays the owner or operator a small amount (\$5 per acre each year). The purpose of these stations is to demonstrate the varieties of the different crops, the cultural methods and the rotations that have been found to give the best results on an experimental farm. The results are contained in the report of the report of the division of botany of the experimental farms for 1927. The plots that received two applications a week of 15 pounds to the acre for eight weeks gave a much better crop than the untreated check plot. The increase in yield was 18.7 bushels to the acre of wheat that yielded number 4, as compared with food wheat from the check plot. The low grade from the dusted plot was due to unfavourable weather conditions during the year. Even the plot that received the four weekly applications at the rate of 45 pounds to the acre, yielded 11 bushels per acre more than the check plot. From the standpoint of net return, the weekly applications of 20 pounds per acre proved the most profitable, the net increase in value per acre due to dusting being \$12.58. While this experiment does not prove that dusting can be depended upon as an economic practice, the experiment does show that applications of sulphur dust when heavy enough and applied at frequent intervals will control rust in growing wheat."

"The crops harvested off these illustration stations are of course the property of the men operating them."

A Subject For Thought

Prejudice Against Immigrants From Europe Not Always Justified

Six years ago a Russian immigrant boy, Leo Malania, landed in Canada. He was utterly ignorant of English. Recently in Toronto, coming with fifteen Canadian-born boys of English ancestry, all champions of their district, he won the oratorical championship of Ontario. His subject, significantly enough, was "The Unification of Canada."

This should give us thought. We have people among us, well-intentioned and sincere, who would bar out all immigrants unless from the British Isles. They may be right, but when one thinks about the young Russian, Leo Malania, and the subject of the discourse with which he achieved his triumph, it challenges doubt.

After all, the great nations of the earth did not achieve their present status by keeping their blood pure. They are, on the contrary, a mixture of many races.

The application of a little history to some of Canada's problems might do a lot of good—Ottawa Journal.

A Flattering Liferes

Sandy had recently had his photograph taken, and, being pleased with it, took it round to show a friend, at the same time asking his opinion. His friend looked it over very critically, and casually remarked: "Rather flattering, isn't it?"

"Flattering," said Sandy. "What makes you think that?"

"Well," replied the other, "I see you have your hand in your pocket."

Airplanes In Rail Survey

The Dominion government will send two airplanes to assist in the joint survey of the Pacific Great Eastern Railway, which is being made by the province of British Columbia and the Canadian National Railways and Canadian Pacific Railway.

Canada ranks third in importance as a source of metals of the platinum group, after Russia and Colombia.

Sulphur Dusting For Rust

Application Of Sulphur Greatly Reduces Loss From Rust

While production by breeding of rust-resistant varieties of wheat is now regarded as the most likely method of relief from losses from rust, it has been proved that applications of sulphur dust to the growing crop will greatly reduce the rust infection. The botanical division of the experimental farm at Ottawa has carried on dusting experiments in Manitoba. In 1926 preliminary experiments were carried out in the case of 15 pounds per acre. Another received eight weekly applications at the rate of 30 pounds per acre. In the third plot dusting was delayed until the 15th of August. It was found that at the rate of 45 pounds to the acre a crop of three weekly applications, 20 can be plus was not dusted. The method of dusting the wheat, and the results are contained in section III of the report of the division of botany of the experimental farms for 1927. The plots that received two applications a week of 15 pounds to the acre for eight weeks gave a much better crop than the untreated check plot. The increase in yield was 18.7 bushels to the acre of wheat that yielded number 4, as compared with food wheat from the check plot. The low grade from the dusted plot was due to unfavourable weather conditions during the year. Even the plot that received the four weekly applications at the rate of 45 pounds to the acre, yielded 11 bushels per acre more than the check plot. From the standpoint of net return, the weekly applications of 20 pounds per acre proved the most profitable, the net increase in value per acre due to dusting being \$12.58. While this experiment does not prove that dusting can be depended upon as an economic practice, the experiment does show that applications of sulphur dust when heavy enough and applied at frequent intervals will control rust in growing wheat."

A Big Wheat Field

Prize Provinces Produce Over Nine Per Cent. More Wheat Grown In Canada

Throughout Western Canada farmers have been busy seeding one of the world's hardest wheat fields, for it extends over about 22,000,000 acres. Last year the Dominion produced 533,571,700 bushels of wheat from 21,119,140 acres, or over ninety per cent. of which was grown in the three prairie provinces—Manitoba, Saskatchewan and Alberta. This year it is estimated about 55,000,000 acres will be sown to wheat in Canada.

Wheat is one of the most important food products in many countries, and the Dominion is one of the world's chief sources of supply. Canada is the largest wheat producer and exporter in the world, and sells it to 47 countries. More than half the crop is marketed by the Canadian Wheat Pool, a farmers' co-operative marketing organization, the largest of its kind in the world.

To Canada, wheat has been a veritable economic fairy. No other crop or natural product has exercised such a vitalizing influence upon the commercial life of the country as wheat, and it still ranks first.

Canada is the best customer of the United States and the extent of the buying power of Canada in the United States depends to a large extent upon the wheat crop.

"Why are deeds better than words?"

Vancouver Base of Large Coast Fleet

Tourist travel is showing an early upward swing on the Pacific Coast, with many travellers utilizing the splendid fleet of the British Columbia Coast Steamship Service. The above photograph taken in mid-April, shows the second largest pier on Granville Street waterfront, every inch of docking space occupied by Canadian Pacific steamers plying the triangle Vancouver-Victoria-Seattle route, and the Alaska West Coast and Gulf Island route. Beginning at the left front of the pier, the ships are:—Princess Adelaide, "Princess Victoria," "Princess Mary," "Princess Royal," "Princess Elaine," "Princess Alice," "Princess Norah." The latter ship shown in the right foreground, is the new West Coast vessel which carried the recent vice-regal party on their coast cruise.

Commercial Fertilizers Must Be Produced In Increasing Amount To Maintain Present Crop Yield

The astonishing computation is made that if the farmers of Canada were to entirely replace by chemical fertilizers the amount of plant food annually used it would cost a yearly expenditure of \$385,000,000. This figure, contained in a new report on "The Commercial Fertilizer Industry in Canada" prepared by the Natural Resources Intelligence Service of the Department of the Interior, at Ottawa, is not intended to create alarm but is merely informative. As a matter of fact the computation embraces the cultivated area of the Prairie Provinces where the soils are naturally very rich, and there is a division of opinion on the present need of fertilizers there. Without considering the three prairie provinces the fertilizer bill would nevertheless be very considerable amounting to over \$141,000,000.

The fact is stressed that such computations are theoretical and of no practical value except as pointing to the immense field open in time for the fertilizer industry in Canada. The aim of the report is stated to be to put before the Canadian public the latest view of experts in fertilizer matters. It is pointed out that commercial fertilizers must be produced in ever increasing amount to maintain present yield and fertility of the soil. The report also shows the amount of commercial fertilizer which Canada is using, might use, and may contribute to the world demand.

Contrasting with the value of the commercial fertilizer theoretically necessary to replace depleted soil is the actual figure of \$5,904,153 expended in Canada for commercial fertilizers in 1927. Though depletion of the soil is going on year after year the annual consumption of fertilizer in Canada is not increasing rapidly as is shown by the expenditure of \$4,685,250 in 1918. It is held that there is a boundless field in Canada for the manufacture of commercial fertilizers but that the full benefit of the growing market awaiting the industry the Canadian demand must be strengthened by education of the farmer and by demonstration of the value of fertilizers. Manufacturers, producers, and distributors need co-operation and the consolidation that other industries are finding necessary with a view to greater efficiency, uniform marketing and economy in production.

An interesting section of the 50-page mimeographed memorandum gives figures to show how the present low rate of yield of the larger crops compared with that in other countries might be profitably increased by the use of commercial fertilizers as advised by the Department of Agriculture. Prevailing tariffs and Dominion Acts regulating such manufacture of fertilizers are dealt with and a map indicates the location and names of producers of commercial fertilizers, and fertilizer materials, whether wholly or partly manufactured in Canada. Copies of the publication may be obtained free of charge from the director, Natural Resources Intelligence Service, Department of the Interior, Ottawa.

Brains To Spare
"We are given 10 times as much brain as we need. Very few persons use 10 per cent. of their brains many but 10 per cent." said Sir Arthur Keith, lecturing at the Royal College of Surgeons, London. He asserted that as a railroad bridge is constructed to carry a weight far in excess of the load, so the brain is constructed to carry a weight far in excess of the load.

Traffic Policeman: "Say, do you know why I stopped you?"
Proud Farmer: "Oh, yes. You want to hear about the cute thing that baby said just before I left the house?"

"How is Antonio?"
"Very bad. Yesterday he had to sell his false teeth to get a bite to eat."—Ben Hunter, *Kidder*.

Real Wealth At Home

Canadian People Will Not Find Fertilizer Opportunities Elsewhere

In January, there were 4,161 persons who came to Canada as immigrants, and 4,427 persons left the country as emigrants.

Assuming that persons move from one country to another to improve their positions in life, one is reminded of an utterance of an English writer, William McFee. In his recently published life of Frohner, Mr. McFee remarks that while the Elizabethan adventurers were seeking gold abroad, and while Frohner was taking back to England what was less rock from Arctic islands, the real wealth of Britain was in the coal about one mile below the estate which Sir Martin was able to purchase in his later years.

Canada is a real land of opportunity. But unfortunately some of her people continue to think that opportunities are better in other lands.

SMART TAILOR
Its tailored simplicity will appeal to your taste for general daytime wear. Interfered in silk crepe in naval dot pattern. The vivid plain silk crepe in gingham and striped which emphasizes its classic tailored lines, is what makes Style No. 481 smart. It is easily made, the pattern for which can be had in sizes 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40 and 42 inches bust. It is fashionable in angora jersey, in chertreuse green, plain white, white silk crepe in violet shade, red and white gingham check in silk crepe, featherweight tweed in wood-violet tones in tiny check pattern, herringbone red crepe de chine, printed pique, navy blue crepe marocain, grasshopper green gorgeotte crepe and blue-violet silk crepe. Pattern for this unusual model price 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

We suggest that when you send for this pattern, you enclose 10 cents additional for a copy of our Spring Fashion Magazine. It's just filled with delightful styles, including smart ensembles, and cate designs for the kiddies.

Passing Of Oratory

There is a tendency on the part of modern audiences to want facts and to dislike excessive verbiage. In times are changing and have changed, and while there should undoubtedly be some attention paid to teaching the average student to talk before his fellows, it is doubtful if a lot of this effort on oratory is really justified.

Timber Consumption For Lumber And Pulpwood Compared

Figures compiled by the Forest Service of the Department of the Interior, afford a striking evidence of the manner in which Canada's forests have in late years been subjected to a heavily increasing demand for raw materials.

The timber consumption in the manufacture of lumber has shown no

very pronounced upward trend in the last decade or so, but the advance of the pulpwood industry has been responsible for changing the whole aspect of forest utilization. Twenty years ago or so the yearly pulpwood cut expressed in terms of standing timber, was equivalent to hardly 20 per cent. of the annual lumber cut. Today the timber consumption for

pulpwood has risen to a point where it is equal to about 77 per cent. of that used for lumber and the trend, except for a slight reaction in 1909-11, has been generally upward. It is quite conceivable that a few more years may see the pulpwood industry outstripping the lumber industry in its yearly tax upon the Dominion's forest supplies.

The main significance of the trend lies in the fact that with these two timber-using industries both developed upon a huge scale, the Dominion now has a vastly increased demand in good forest management. Forest conservation today should have behind it an infinitely stronger commercial incentive, and support than ever before.

Making the Farm Popular

Learning Scientific Methods Proves Fascinating To Students

Pessimistic views as to the future of Canadian agriculture should have been dispelled from the mind of anyone who attended the winding-up dinner given to the pupils of the short courses which have been held. The enthusiasm that was evident among all the students proved that education in scientific methods of farming can be as fascinating as any other type of learning, when it is carried out under teachers who love their work, and by boys and girls who are in a receptive mood. It is not hard to realize that the practical teaching which they receive, and which is a good deal more attractive to the active minds of the young folks than the laborious memorizing of "a, a, a, a, a, a," or the struggle with a recalcitrant come (not com) section.

Larkins: "Does your wife like a pipe?"

Sparkes: "No, she doesn't smoke at all."

One kind of failure is the man who has never yet tried to accomplish anything.

Leaning Tower Dispute Still Rages

Old Discussion Comes Up Again Regarding the Tower Of Pisa

"Why does it lean?"—that old, old question reverberating around the tower of Pisa is again the subject of violent debate in Italy, says the Italy-America Service. There used to be two schools of opinion: One held that the tower was intended to lean from the beginning—a quaint conceit of the architect; the other maintained that a subsidence of earth inadvertently caused the tilt. A third school is now busy converting the tower into a leaning tower. Here is what really happened. The original architect intended it to be straight. When partially built it began to lean. The builders then offset the leaning by continuing the construction at an angle to balance. All agree, however, that Pisa's tower is strikingly beautiful and safe.

It takes 1,500 men to hold an automobile together, but it only takes one to spread it all over the landscape.

Some people would have to work overtime if they practiced half of what they preached.

A HARD PAR 4

No. 8, Tekarra's Cut—430 yards, Par 4.

Many hopes for a fine score have been wrecked by hole No. 8 of the Jasper Park Lodge Golf Course, Jasper National Park, Alberta, over which the Canadian amateur championship of the A.C.C.A. will be played from August 18th to 24th this season. It is a dog-leg with a high knoll to be negotiated before the second shot can be placed on a sloping green that is lightning fast and guarded by a deep grass covered ditch. The contour of this green is such that an error of a fraction of an inch in putting means disaster.

Co-incident with the Canadian Amateur, the Western Canadian Amateur will be played over the Jasper Park Lodge Course, and this will provide the opportunity of competition for those whose high handicaps automatically keep them out of the Dominion event.

The upper photograph shows the fairway just below the elevated tee. Below is a sketch to show the hole in detail. Play in the tournament will take place from No. 1 tee.

Saskatchewan Wheat Pool Conducting a Survey Of Wheat Grown In Province

Enough Business For All

Hudson Bay Route Will Not Affect Eastern Or Western Ports

Vancouver is rapidly growing as a grain port. Last year there were handled through the British Columbia metropolis 30,000,000 bushels, and this year, before the season closes, the 100,000,000-bushel mark will be passed. In 1909 the Government built a grain elevator in Vancouver. The politicians were laughed at and it was the built, of paragraphs. For five or six years it stood idle. In 1914 the Panama Canal was opened and the Government shipped an experimental shipload of grain via Vancouver and the Panama Canal to Europe. It proved a success. Since then the shipment of grain via Vancouver has steadily increased until this year it will top the 100,000,000-bushel mark. Now all of Alberta's grain seeks the markets of the world via Vancouver and Prince Rupert. The outlook for all of the crop of the Peace River country will be shipped through British Columbia ports.

Yet, despite this huge flow via Western ports, the Eastern Atlantic harbors have all the grain they can handle. The Western crop is so increasing that there is business enough for all. Even if the Hudson Bay route proves feasible for shipping of grain to Europe, there is no need of either Atlantic or Pacific ports worrying. The move outlets to the markets of the world the better for the world's grain.

Depends On The People

Churches In Russia Closed Only When Majority Favors Change

Five hundred and thirty-two places of public worship closed in the Soviet Union in 1928. They were converted into clubs, public schools, boarding houses, libraries and reading rooms, ambulances and kindergartens, cultural centers, museums.

Two hundred and fifty-three more places are marked for similar conversion this year, but there will be plenty left for religious purposes.

A recent survey showed that there were some 50,000 churches in all of Russia.

The places of worship are closed, religious purposes only when a majority of the local population favors the change. A vote is taken if the initiative comes from local authorities.

The 1928 list included 251 orthodox churches and 28 monasteries; 59 synagogues, 38 mosques, and 13 buildings belonging to various sects.

Waging War Against Gophers

Bounty Offered By Alberta Department of Agriculture

Cash prizes ranging from \$1 to \$25 will be paid by the Alberta Department of Agriculture for gopher tails and feet and eggs of crows and magpies taken in Alberta on or before November 1. A special feature has been added to the bounties this year, also, for crows and magpies taken early in the season, and on or before June 30. Feet of crows or magpies will be credited with five points each; eggs of crows or magpies will be credited with five points each and tails of gophers will be credited with three points each prior to this date.

Old From Bituminous Sand

Alberta Government Will Undertake A New Experiment

The Alberta Government intends to separate oil from a quantity of bituminous sand and to turn over to commercial institutions the oil produced in order that tests may be made, also to test the oil extracted in road construction projects. That the oil is also surveys planned under Dr. Wyatt, a water survey in charge of Dr. Rutherford and a Pre-Canadian survey with Dr. Cameron in charge.

Need Packing Plant For Saskatoon

The Saskatoon Board of Trade is moving to develop the livestock industry in the region to the point of being able to support a packing plant. Commissioner J. H. Holmes recently pointed to the large increase in stock shipments from the city as significant of the growing need and necessity for a packing plant.

Why bridge work is mentioned now you have to read and see it's teeth, ears, or viaducts.

The Saskatchewan Wheat Pool is conducting a survey of the varieties of wheat grown in this province. This work has been undertaken in conjunction with the provincial experimental committee, which was constituted in the spring of 1923 at the request of the pool, to bring about the desired uniformity of recommendations by agricultural authorities.

A questionnaire was sent out to 6,000 members of wheat pool committees. Approximately 2,500 replies have been received. Among the questions asked were the following: "What variety of wheat do you grow? Why that variety? What other varieties are grown in your district? Why are they grown? What variety is showing the most rapid increase?"

The replies are now being tabulated. The pool has had the co-operation of the university, the provincial department of agriculture and the Dominion experimental farms.

Another piece of work has been undertaken by the Manitoba and Saskatchewan pools in co-operation with the Western Canadian Society of Agronomy in determining the extent of admixture of varieties and where admixture takes place.

Simultaneously this year, in Saskatchewan and Manitoba, under the direction of the interprovincial committee of the Western Canadian Society of Agronomy, the pools have collected samples of wheat: (1) as sown by farmers; (2) as delivered by farmers to country elevators; (3) as delivered by railroads at terminal elevators; (4) as loaded into lake vessels by terminal elevators; and (5) as delivered by ocean vessels to British markets.

The samples thus collected are being grown by the experimental institutions in the provinces along with pure samples of the wheat varieties grown in the Dominion and in western Canada. Milling and baking tests will be made from these pure samples and compared with similar tests made from the admixture of varieties as found in the various samples of wheat grown on representative farms from the samples collected.

It is hoped by this work to arrive at an answer to the question as to who is responsible for the mixture of varieties which takes place between pure seed and the old country miller, and in what manner such mixture affects the quality of the flour.

Vancouver Airplane Factory

New Concern Will Commence Operations At Coast City

Establishment of Vancouver's first airplane factory will be undertaken at once following the merger of Hoffman-Beeching Shipbuilders Limited with the Royal Canadian Corporation, of Seattle, it is announced by Henry Hoffman, President of the British Columbia concern. The new company will be known as Boeing Aircraft Limited, of Canada. It will be a Canadian concern, using Canadian labor and material, the engines being manufactured in Montreal.

Know That One

Earl Beatty, of Jutland fame, tells this:

"Two old-time sailors detailed for special duty from their ship were making out a list of rationed goods. One of them said to the other: 'Jack to his mate who was doing the writing.'"

"Sister—sister—sister let's see a topic. 'Oo d'yer spell that?'"

"Why, t-a-b-o-o, t-a-p-o-o-k. Well look, ere, put down 'rice.'"

"Right, you are mazy," said the one doing the writing. "Two pounds r-i-c-e."

Jim: Why did everyone cry during the death scene at the theatre to-day? They must have known that the actor was dead.

Jack: That was just the reason.

"What are you playing there?" "Heavens, I have been playing all the day by marks."—Laurie Kolner *Edinburgh, Glasgow*.

WORLD HAPPENINGS BRIEFLY TOLD

Dame Emille Charlotte de Blais, better known as Lily Langtry, left \$37,225.

Canada is the only Dominion that recorded an increase in British immigration in 1928.

Without explanation of the delay, the post office has delivered to Clifford C. Gilbert of New Haven, Conn., a letter mailed October 15, 1912, in Hartford.

After an illness of many months, Senator Robert Watson, 76, pioneer of the prairies, and for years prominent in western political circles, died at the home of his daughter, Mrs. J. Hillon McGregor, Brandon, Man.

Word of the death of P. E. Richter, engineer on the first train to enter what is now Vancouver, on May 23, 1887, was received by D. C. Coleman, vice-president of the Canadian Pacific Railway, Mr. Richter died at his home in Vancouver.

Harbour improvement here passed in the House today \$10,000,000 for Montreal Harbor; \$10,000,000 for Vancouver Harbor; \$3,000,000 for Halifax Harbor; and \$2,000,000 each for the harbors of Three Rivers and Chicoutimi.

The West Indies is considering establishing a trade commissioner in Canada, Sir Edward Dawson, chairman of the West Indies conference, stated at Ottawa, Sir Edward is investigating trade possibilities in Canada.

Among the entrance scholarships awarded at Upper Canada College, are: The Gordon Entrance Number 1 (value \$600 a year for three years)—Robert Kay (Gordon, Edmonton, Alta.; Number 3 (value \$600 a year for three years), Edgar Stanfield, Edmonton.

Alberta Has Surplus

Closes Fiscal Year With More Money Left Over Than Ever Before

Alberta closed the fiscal year ended March 31, with more money left over in the provincial treasury in excess of expenditures than ever before in the history of the province, \$1,877,671 being the exact amount, according to an announcement made by Provincial Treasurer Hon. R. G. Reid. The surplus for the current fiscal period, ended March 31, 1928, was \$279,763, covering 15 months, because of the change of the fiscal year dates adopted last year.

The Board of Health

Strolling along the quays of New York harbor, an Irishman came across a wooden barricade placed around the enclosure where emigrants suspected of suffering from contagious diseases are isolated.

"What's this barricade for?" he enquired of a bystander.

"Oh," was the reply "that's to keep out fever and things like that, you know."

"Indeed," said Pat, "I've often heard of the board of health, but by jehobah, it's the first time I've seen it!"

Corn disappear when treated with Holloway's Corn Remover without leaving a scar.

Production Of Asbestos

Canadian asbestos, which is of the chrysotile or serpentine variety, is practically all obtained from the Eastern Townships, Quebec.

INDIGESTION RELIEVED QUICKLY

CARTER'S LITTLE PINK PILLS add nature's active life to your digestive system. Often one of these little pills taken after meals or at bedtime will do wonders, especially when you have overeating or are troubled with constipation. Remember they are made of pure mulla, yarrow and old cane sugar. All druggists and the red pills.

Italy Has Ambitious Road Building Program

Fifty Thousand Men To Construct Motor Highways

Because Premier Benito Mussolini has ordered it, Italy soon is to embark on the most ambitious road building programme any modern European state has attempted—perhaps the largest since the famous road builders of ancient Rome took their art into Britain. Within five years every corner of the peninsula will be accessible to the motorist. In all 40,000 miles of new motor highways are to be constructed. Fifty thousand men are to be engaged in working out the programme.

THE RESPONSIBILITY OF EVERY MOTHER

The child in the home is a never-failing source of joy, but at the same time a never-failing responsibility to the fond mother. It not infrequently happens that minor ailments of the child disturb and puzzle her. She does not know just what to do, yet feels that not serious enough to warrant calling in the doctor. At just such times as these it is found that Baby's Own Tablets are the mothers greatest help and friend.

Most childhood ailments arise in the digestive tract—the bowels being clogged and the stomach sour. Baby's Own Tablets are a never-failing relief for this condition. They are mild but thorough laxative. They through their action on the stomach and bowels they banish constipation and indigestion; break up colds and simple fever; allay the pain accompanying the cutting of teeth and promote health-giving sleep. Concerning them Mrs. W. Jennings Mackay, writes: "I have used Baby's Own Tablets and think so highly of them that I would not be without them. Please send me your little booklet on the care of children."

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from the Dr. Williams' Medicine Co., Brockville, Ont.

Record Of Earthquakes

On the average over 200 earthquakes a year, or roughly one a day, are registered on the seismograph at the Dominion Observatory, Ottawa. The majority of these, however, do not involve any serious disturbance anywhere, and comparatively few originate in Canada.

Dr. J. K. Kellogg's Asthma Remedy, Dr. J. K. Kellogg's Asthma Remedy, is a medicine dealer or by mail at 25 cents a box from the Dr. Williams' Medicine Co., Brockville, Ont.

"Doctor, what shall I take to cure kleptomania?"

"Don't take anything."

Only those who have no worries can afford to look worried.

BRAVES CHILLY WATERS

The noted bells of Bow Church in the City of London, the bells that chimed the old time, "Turn again, Whittington," are not ringing. The bells are out of order and money for their repair put available.

CANADIAN MINISTER TO FRANCE

Mr. W. H. Askew, Of Scotland, Donates Large Sum To Aid British Colonization In Canada.

The Department of Colonization and Development of the Canadian Pacific Railway announces a munificent gift on the part of Mr. W. H. Askew, of Ladybank, Scotland, to the cause of British colonization in Canada.

Mr. Askew, who is a gentleman of means and well known in Scotland for his liberal public spirit, has provided ten thousand dollars to enable suitable families from the border regions of Scotland and England to emigrate to Canada and engage in agricultural work.

Forty of these families are now on their way from Great Britain, and their departure has received wide publicity in the British press on account of the original circumstances under which these families are being moved.

The fact that Mr. Askew has provided ten thousand dollars makes possible, under the provisions of the Emigration Settlement Act, an advance of a further ten thousand dollars for the forwarding of suitable British families to Canada. The Act in question authorizes the Secretary of State to co-operate with private organizations in formulating and carrying out schemes for affording joint assistance to suitable persons from Great Britain, who intend to settle in any of the Overseas Dominions.

It is quite possible, therefore, that as a result of Mr. Askew's decision to assist prospective British colonists in Canada, some thirty or thirty-five families may be engaged in the Colonization and Development scheme. The number depends on the precise amount advanced to each particular family.

At Mr. Askew's request the Department of Colonization and Development, Canadian Pacific Railway, has entered into an agreement with the Department of State for Colonization Affairs, for the recruiting, placement and maintenance of the occupants of general administrative work connected with the scheme.

The families which will arrive during the next week-end will be at once distributed on arrival in Canada to placement which has already been assigned to the five families having been allocated to the Colonization and Development Association, subsidiary of the Department of Colonization and Development; others will occupy new farms recently acquired by the Colonization Branch of the Canadian Pacific, and the remainder on farms recently acquired by the Colonization Branch of the Overseas Settlement Committee.

Asked for his personal comment on the new scheme Colonel Sir James D. Dennis, C.M.G., Chief Commissioner of the Department of Colonization and Development, said: "I have no doubt that the Colonization and Development scheme is one of the most important of the movement of British colonists to the Dominion of Canada, and that it will be of great benefit to the Dominion on the part of all organizations connected with it. It is a most important step in the development of the Dominion, and it is well known that we have always concentrated our efforts on the movement of the largest possible number of British colonists to Canada, spending large sums in that connection, but due to conditions which have existed in the last few years and the administrative difficulties which have arisen, we have been unable to carry out our plans. It is now, however, that the future, marks a step forward in the progress of British colonization in Canada, and we are greatly pleased, of course, that Mr. Askew should have seen fit to join in this proposal, which is now being carried out by the Dominion of Great Britain, and will continue to reflect the greatest credit and satisfaction to its sponsor."

Mr. Askew's munificent action is a most important step in the movement of British colonists to the Dominion of Canada, and it will be of great benefit to the Dominion on the part of all organizations connected with it. It is now, however, that the future, marks a step forward in the progress of British colonization in Canada, and we are greatly pleased, of course, that Mr. Askew should have seen fit to join in this proposal, which is now being carried out by the Dominion of Great Britain, and will continue to reflect the greatest credit and satisfaction to its sponsor."

Mr. Askew's munificent action is a most important step in the movement of British colonists to the Dominion of Canada, and it will be of great benefit to the Dominion on the part of all organizations connected with it. It is a most important step in the development of the Dominion, and it is well known that we have always concentrated our efforts on the movement of the largest possible number of British colonists to Canada, spending large sums in that connection, but due to conditions which have existed in the last few years and the administrative difficulties which have arisen, we have been unable to carry out our plans. It is now, however, that the future, marks a step forward in the progress of British colonization in Canada, and we are greatly pleased, of course, that Mr. Askew should have seen fit to join in this proposal, which is now being carried out by the Dominion of Great Britain, and will continue to reflect the greatest credit and satisfaction to its sponsor."

PRODUCT OF GENERAL MOTORS OF CANADA, LIMITED

CANADIAN NATIONAL Making Low Cost VACATIONS

Possible for thousands of Residents in Western Canada

SUGGESTIONS:
Jasper National Park,
Pacific Coast, Alaska,
Monte,
Ontario, Quebec,
Maritime Provinces,
Overseas Tour.

IN arranging low fares for prairie residents, we regard this part of our work as a great and important public service... always ready with men, equipment plus the experience which enables us to care for any movement with smoothness and efficiency.

THIS summer—escape for a little while from the dull sameness of succeeding days. Our low fares from May 15 to Sept. 30 (with a final return limit Oct. 31, 1929) make it easy.

OUR trains pass through a territory replete with scenic grandeur; of historical and educational value to the traveller. Nothing superior to our sleeping and dining car service... Radio, an added feature on through trains.

THINK IT OVER!

Whatever vacation section you have in mind, our local agent will be pleased to give every assistance. He will be glad to quote lowest fares and make all arrangements for you—or write J. MADILL, District Passenger Agent, Edmonton

About Town and Country

Prize lists for the 1929 summer fair are now being printed, and will be available for distribution early next week. Mr. John P. Rorabeck is secretary of the Agricultural Society this year.

The total precipitation for Saturday and Monday was over one inch. Saturday's rainfall, which commenced about 6.45 a.m. and lasted till late in the afternoon, was responsible for 31 inch, while Monday's rainfall which started shortly after 8 a.m. and continued till about 9.45 p.m. produced .71 inch.

Mr. William Hogan, who has been attending the School of Technology and Art in Calgary, returned to Oyen last Monday. He is going to work on the grader for the M. D. of Cereal.

Maintenance work, which includes re-ditching, is being done on the "Golden Grain Belt" highway, from Alaska, west.

Rev. H. C. Woods, returned from Calgary, last Saturday, after attending the annual Alberta convention of the United Church of Canada.

Mr. A. O. MacArthur, director of the Fuego Oil Co., arrived in town last Monday from Toronto, accompanied by Mr. McMaster, driller. Later in the day they left for the well site. New casing is being trucked out to the site daily.

The old wood sidewalk on the west side of Main Street, was torn up last week, and the ground is now being prepared for a new concrete walk, from the bank corner north.

The Oyen ball team left this morning for Enniskillen, to play in the baseball tournament.

Mr. and Mrs. Fred J. Whitlock and two children were the guests of Mr. and Mrs. M. G. Whitlock during the latter part of last week. They motored here from Disnare, Sask., arriving Friday and left for their home again Sunday.

Mr. E. Johnansen arrived in Oyen this morning from Folkeville, and commences his duties on the staff of the Bank of Toronto as accountant.

Mr. Gene ("Major") Connors, of Vancouver, well known wrestler, and formerly a resident of this district, is a town visitor to-day.

George J. Benbow PIANIST and TEACHER

Wash Day Freedom On the Farm

Stepping on a pedal starts the dependable simple gas engine which runs the new

Connor Thermo Washer

—the washer with the large insulated steel enclosed copper tub. Day by day, Connor Washers are going into more homes, and are giving unqualified satisfaction. Power washing machines are no longer considered a luxury. They are just as essential in the home, as any modern implement on the farm. Eliminate wash-day drudgery by putting a Connor Thermo Washer in your home.

After the rush of seeding, you will possibly be thinking of painting your barn or garage. We carry pure linseed oil Barn Paint, suitable for either. See us about your paint problems.
